THE PROBLEM

Canada Geese settle on golf courses, private ponds, and commercial retention ponds and remain only to create a nuisance. Each goose drops two to four pounds of excrement daily and creates tremendous noise.

Authorized Distributor of

AWAYWITHGEESE

THE SOLUTION

- * Disrupts geese sleep patterns, causing them to move to another pond.
- * The product works at night, 7 days a week.
- * Solar power recharges batteries - no changing batteries or running electricity to the site.
- * Maintenance free
- * Environmentally safe and effective
- * Amber light barely noticeable to humans and pets
- * Solves Geese Problems quickly
- * Works on line of sight for effective coverage up to 75 yds from placement. (over 3 1/2 acres)

100 % Satisfaction Guarantee

AwayWithGeese will have an immediate impact on non-nesting geese. Unfortunately, there will be a delayed impact on nesting adults with goslings. If you are not satisfied with product performance after 90 days of use, then, **AwayWithGeese** will authorize the return of the product for a full refund.

AwayWithGeese is warranted against defects in material and workmanship for 2 years from date of purchase.

75 Yard Line-of-Sight Coverage

What if I have geese at my pond that have recently had goslings? Will the mother and goslings be deterred?

Mother geese will not forsake their goslings under any circumstances. However, after thirteen to fourteen weeks the goslings are weaned of their mother and capable of flight. At this point, **Away With Geese** will deter both the mother and the developed goslings.
