

## Recommended Landscape Professionals

**Naperville Mulch Sales is not in the business of installing mulch. We distribute material.**

Over the years we have developed an affiliation with many landscape companies. These companies install our mulch products exclusively. We only recommend companies we believe to be honest upstanding business examples within our industry. They all are full service landscape companies.

**Please read:**

**\*\*BEWARE** of the out of town companies that come door-to-door offering to mulch your landscape. They often sell you far more material than actually given (sometimes as much as three times the actual amount) and/or they call a product "Premium" that really is not. They throw out an attractive price on a per yard basis and then charge for a far greater quantity than what is given...inflating the total price. (I live in Naperville and have even had unsolicited sales quotes left at my door by local "Elite" companies who inflated the quantity and tried to pass off an inferior product.) Please take the time to use our mulch calculator. You can determine very quickly the specific mulch requirement for your landscape thereby eliminating the guesswork and keeping your contractor honest.\*\*

Simply call our recommended companies or click on the link to their site to discuss the installation of our products. They can not only install our mulch, but also provide you services for a host of additional landscaping projects.

Contact them for an estimate. After you arrange a date for install with them, they will coordinate your delivery with us... or simply pickup your material here at our facility and bring it to the job.

## Landscape Professionals

**In no particular order:**
